

Name of Website: Healthify

Description: This website will be designed to service healthcare professionals in handling patient data, as well as allowing patients to access a portal to check on upcoming appointments, prescriptions, and treatment plans.

Page Names: Home, Patient Data, Patient Portal, Provider Portal, Calendar

Data being used: The data being used will be a database that keeps track of all patient data, including prescriptions, upcoming appointment dates, treatment plans and comments, as well as a username and password tied to each patient to allow them to see this information from the patient portal.
